

Credit Name: CSE3010 - Computer Science 3

Assignment Name: Mastery - Break A Plate

Error Log Entry

What error message did you encounter (if any)?

No actual error message appeared.

What unexpected behavior did your program exhibit?

The gameplay worked fine until I added the statement to reset the game when "Play Again" was pressed. When this was added, the game wouldn't play at all.

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

Logic error - I entered both the 'play' and 'play again' as if statments.

Include a screenshot of specific lines of code.

```
public void actionPerformed(ActionEvent e)
{
    int num1 = (int)(Math.random() * 3) + 1;
    int num2 = (int)(Math.random() * 3) + 1;
    int num3 = (int)(Math.random() * 3) + 1;

    if(button.getText().equals("Play"))
    {
        if(num1 == 1 && num2 == 1 && num3 ==1)
        {
            plates.setIcon(allBrk);
            prize.setIcon(tiger);
            button.setText("Play Again");
        }
        else
        {
            plates.setIcon(twoBrk);
            prize.setIcon(sticker);
            button.setText("Play Again");
        }
    }
    if(button.getText().equals("Play Again"))
    {
        plates.setIcon(unbroken);
        prize.setIcon(blank);
        button.setText("Play");
    }
}
```

How did you fix the issue?

I turned the second 'if' statment into a 'else if' statement

Provide the corrected code or solution using a screenshot.

```
public void actionPerformed(ActionEvent e)
{
    int num1 = (int)(Math.random() * 3) + 1;
    int num2 = (int)(Math.random() * 3) + 1;
    int num3 = (int)(Math.random() * 3) + 1;

    if(button.getText().equals("Play"))
    {
        if(num1 == 1 && num2 == 1 && num3 ==1)
        {
            plates.setIcon(allBrk);
            prize.setIcon(tiger);
        }
        else
        {
            plates.setIcon(twoBrk);
            prize.setIcon(sticker);
        }

        button.setText("Play Again");
    }
    else if(button.getText().equals("Play Again"))
    {
        plates.setIcon(unbroken);
        prize.setIcon(blank);
        button.setText("Play");
    }
}
```
